* Labelling

INTERNATIONAL DEPOSITARY AUTHORITY

- **STATEMENT** *in the case of an original deposit pursuant to Rule 6.1*

in the case of a conversion pursuant to Rule 6.4.d

in the case of an associated contract (component)

- **TYPE OF MICROORGANISM** *Bacteria*

- **SINGLE MICROORGANISM**

MIXTURE OF MICROORGANISM

GIVE THE NUMBER OF MICROORGANISMS AND THEIR TYPES WHERE APPLICABLE

*The undersigned hereby deposits the microbial material identified hereunder
and undertakes not to withdraw the deposit for the period specified in rule 9.1*

1.

IDENTIFICATION REFERENCE

NUMBER SYMBOLS etc GIVEN TO THE MATERIAL BY THE DEPOSITOR

2.

DEPOSITOR(S)

Name(s) and address (es)

3. **SCIENTIFIC DESCRIPTION**

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

☐*Taxonomy* *Family - Genus – Species :**Common bacteria name:**Serological type , etc:**Natural host**Natural vector**Characteristics*

MARK WITH A CROSS WHERE APPLICABLE AND GIVE ADDITIONAL INFORMATION

☐*New isolate*

☐*Recombinant*

☐*Modified characters*

☐*Further or other particularities*

Details

CRITERIA OF THE PROPOSED CLASSIFICATION; DESCRIPTION OF THE VECTOR AND THE INSERTED NUCLEIC ACID FRAGMENT IN THE CASE OF A RECOMBINANT MICROORGANISM; ETC

Literature references

THE SUPPLYING OF SUCH INFORMATION IS OPTIONAL. BUT STRONGLY RECOMMENDED IN ACCORDANCE WITH RULE 6.1.b.

4.

PROPERTIES DANGEROUS TO HEALTH OR ENVIRONMENT☐

The microorganism or the mixture identified under 1 above has the following properties which are or may be dangerous to health or/and the environment

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

☐

The undersigned is not aware of such properties

ANY DIRECT OR INDIRECT, KNOWN OR LIKELY TO BE EXPECTED EFFECT ON ANY ANIMAL, VEGETAL OR OTHER ORGANISM MUST BE INDICATED

MARK WITH A CROSS THE APPLICABLE BOX

5.

BIOSAFETY MEASURES REQUIRED TO MANIPULATE THE MICROBIAL MATERIAL☐**L1/P1**☐**L2/P2**☐*Others* _____

6a.

REQUIREMENTS FOR PROPAGATING THE BACTERIA☐

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

MEDIUM *(give full details if special formulation)*

INCUBATION

Further details

6b.

METHOD USED FOR OBTAINING THE MICROORGANISM CULTURE

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

*Details for propagating the bacteria**Details for preparing the suspension*

6c.

METHOD USED FOR QUALITY CONTROLS

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

*Technique**Suggested media (if not the same as given under 6a above)**Further comments (give full details if special proceeding)**Time for reading the results*

7.

FURTHER CHARACTERISTICS TO BE CHECKED CONFIRMING THE VIABILITY OF THE MICROORGANISM☐

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

Where a mixture of microorganisms is deposited, descriptions of the components of the mixture and at least one of the methods permitting the checking of their presence should be given in accordance with Rule 6.I.a.iii.

8.

CONDITIONS FOR STORAGE☐

MARK WITH A CROSS IF ADDITIONAL INFORMATION IS GIVEN ON AN ATTACHED SHEET

Long-term maintenance☐*by freeze-drying and storage at*

_____ °C

☐*by freezing at* _____ °C☐*or prepared as follows*

*Particularities in suspension preparation as far as conservation is concerned**Suspending fluid**Further comments*

DEPOSITARY AUTHORITY

DEPOSITOR(S) Name(s) and address(es)

Concerning the microorganism identified hereunder (*)

IDENTIFICATION REFERENCE

NUMBER, SYMBOLS, etc, GIVEN TO THE MICROORGANISM BY THE DEPOSITOR

1.- The depositor recognizes being aware of the requirements and recommendations concerning the deposit of microorganisms under the Budapest Treaty.

2.- The IZSLER shall accept the above-identified microorganism provided

all the requirements for validity of the deposit are fulfilled pursuant to Rule 6.1.(a) or 6.2.(a) and to Rule 6.3.(a) of the Budapest Treaty, implying that:

the IZSLER has received twelve samples from a same subculture of the above-identified microorganism, prepared with a view to a long-term storage in accordance with the given instructions (#), marked legibly and indelibly with the identification reference and the date of preparation;

and a preliminary examination of one of the samples received by the IZSLER has shown that the pieces of information given in compliance with Rule 6.1.a.(iii) of the Budapest Treaty are valid and the material transmitted by the depositor is acceptable with regard to Rule 6.4.(a) of the Budapest Treaty.

(*) 'MICROORGANISM' means any biological material the IZSLER is liable to accept for deposit under the Budapest Treaty.

(#) The vials must agree with the storage equipments of the IZSLER; they must be airtight, without any risk of cracking, breaking or explosion for the period provided for in Rule 9.1. of the Budapest Treaty.

- 3.- As soon as the microorganism is received, the IZSLER may pass a registration number on to the depositor. The receipt and registration of a microorganism will not imply its acceptance.
- 4.- A refusal to accept the microorganism may be notified in the circumstances laid down in Rule 6.4.(a) of the Budapest Treaty.
- 5.- If any of the requirements for validation of the deposit are not met, a procedure of deferment of the acceptance shall be applied: the IZSLER shall notify the depositor in writing of such postponement and of the reasons there for; it shall allow the depositor an one-month time limit for compliance with all his obligations. If the depositor does not comply with the requirements in the time allotted to, the IZSLER shall cancel the request of deposition and destroy the transmitted biological material.

This procedure may imply a replacement deposit (\$) where any irregularity concerning the state, quantity or presentation of the transmitted biological material is noted by the IZSLER in the case of an original or of a new deposit. A replacement shall be regarded as another original deposit as long as the viability of the deposit waiting for acceptance is not established.
- 6.- Each time a biological material is transmitted to the IZSLER by the depositor, the IZSLER shall charge the fee for storage provided for in Rule 12.1.a.(i) of the Budapest Treaty.
- 7.- If the deposit is accepted, the accession number assigned to by the IZSLER shall be identical to the registration number and the date of deposit shall be the date the IZSLER has received the above-identified microorganism.
- 8.- The notification of the acceptance, the refusal or the cancellation of a request for deposit shall be done by the IZSLER within a six-months time limit after receiving the microorganism. Acceptance shall be attested by the receipt.
- 9.- Once the depositor has complied with all the requirements of the applicable regulations, the IZSLER shall carry out the first viability testing.
- 10.- The first viability statement shall attest the validation or the cancellation of the deposit: if the microorganism is viable the deposit shall be validated; if the microorganism is not viable the deposit shall be cancelled.
- 11.- In the case of a refusal, a cancellation of the request for deposit or a cancellation of the deposit, the samples of the transmitted biological material shall be destroyed. If the depositor disagrees with the reasons of the refusal or cancellation, the samples may be maintained by the IZSLER; they shall not be sent back to the depositor except in the case of a particular agreement made after receipt of the notification of the refusal or cancellation by the depositor; the samples never can be deposited with the IZSLER for other purposes.
- 12.- The fee for storage provided for in Rule 12.1.a.(i) of the Budapest Treaty shall be charged in all cases whatever the circumstances, either acceptance or refusal or cancellation of the deposit.
- 13.- The depositor undertakes to deposit under an associated agreement any not or hardly available living biological material necessary for the controls and/or the storage of the above-identified microorganism.
- 14.- The depositor undertakes to supply the IZSLER with any not or hardly available substrate necessary for the controls and/or the storage of the above-identified microorganism in a quantity allowing twelve tests or passages.
- 15.- The depositor recognizes having communicated all indications he is aware regarding any known or foreseeable action of the above-identified microorganism on humans or any animal, plant or other organism, in a direct or in an indirect way.

He undertakes to notify immediately the IZSLER of any further information relating to this.
- 16.- Once the microorganism is accepted, the IZSLER shall store it, perform the viability controls, issue any relevant declaration, certification or notification and release samples of the deposit to any authorized, certified or requesting party pursuant to the applicable regulations.

(§) 'REPLACEMENT DEPOSIT' means a supplementary series of samples of the microorganism subject of an original or of a new deposit waiting for acceptance, transmitted to the IZSLER on its request within the time limit allotted to and in one release; the samples shall be prepared in accordance with the given instructions; they shall be accompanied by a declaration similar to that referred to in Rule 6.2.(a) of the Budapest Treaty.

17.-Each time the IZSLER considers advisable to send a sample of a subculture from the above-identified micro-organism to the depositor (**) with a view to an authenticity check, the depositor (**) shall verify the expression of the relevant properties by the microorganism in the said subculture; the form included in the sending shall be duly completed, signed and returned to the IZSLER within a three-months time limit after the sample has been received.

The depositor (**) recognizes, where the above-referred form is not returned to the IZSLER in the time allotted to, the properties of the said subculture are to be considered identical to the properties of the subculture transmitted to the IZSLER at the date of deposit.

18.-The depositor cannot withdraw, cancel or modify the deposit during the storage period provided for in Rule 9.1 of the Budapest Treaty.

The above-identified microorganism shall in any case be stored by the IZSLER for a period of 35 years.

19.-When the storage period expires, the whole biological material shall be destroyed, except in the case of a particular agreement made at the request of the depositor during the thirty fifth year of storage.

20.-If for any reason the IZSLER cannot furnish samples of the above-identified microorganism once accepted and its viability stated, the depositor shall proceed to a new deposit of the microorganism which was originally deposited, in compliance with the applicable regulations, within a three-months time limit after he has received the relevant notification by the IZSLER.

The reasons based on good practice as for Depositary Authorities that lead to refuse the release of samples are entirely left to the assessment of the IZSLER.

21.-If a variation in the characteristics, a loss of viability, a contamination or an accidental destruction of the deposited biological material is noted despite the application of the precautions complied with for its preservation, the IZSLER will bear no responsibility.

22.-If by the fault or the negligence of the depositor damage is caused to the IZSLER at the time of receipt or during handling or storage of the above-identified microorganism, the depositor shall compensate the IZSLER for the said damage.

23.-The depositor guarantees that no action will be undertaken against the IZSLER for the compensation of damage relating to the release of a sample of the above-identified microorganism, unless the fact of damage can be imputed to the fault or negligence of the IZSLER.

24.-In the case of dispute the Italian law shall be applied and the competent court shall be the Italian Court.

THE DEPOSITOR(S) (*)**

Date and signature(s)

**THE SCIENTIST(S)
in charge of the microorganism**

Date and signature(s)

∞

(**) The obligations indicated in Point 17 may be ensured either by the depositor or equally by the scientist designated by the depositor.

(***) When a deposit is requested by several depositors, the signature of each co-depositor is required on the relevant form and contract. In this case one of the depositors shall be designated as unique representative acting for the others. This latter will receive all the original documents issued by the IZSLER during the whole storage period.
